Overview

Dynamic and results-oriented web developer with extensive experience in web technologies, search engine optimization, and software development. Adept at enhancing website performance, user experience, and SEO rankings. Proven ability to collaborate with clients and cross-functional teams to deliver high-quality, tailored solutions. Proficient in a wide array of technologies including HTML, CSS, React, Next.js, JavaScript, TypeScript, Node.js, and more.

Experience

[Web Developer]

[Remote] [2022-Present]

- Developed responsive websites and web applications using a broad skill set including HTML, CSS, Tailwind CSS, React, Next.js, JavaScript, TypeScript, Bootstrap, Node.js, Express.js, MongoDB, and MySQL.
 - Worked closely with diverse clients to understand project requirements and deliver customized solutions.
- Designed and implemented reusable components and modules to streamline development processes and enhance code maintainability.
- Ensured high-quality deliverables through rigorous testing and optimization across various platforms and browsers.
- Managed version control and deployment workflows using Git, GitHub, Netlify, and Vercel.
- Utilized Figma for UI/UX design and Eclipse for Java development.

[AI Code Quality Analyst]

[RWS]

- Trained Google's BARD to enhance its coding capabilities by reviewing and refining code generated in response to user queries.
- Conducted extensive research to verify code accuracy, correcting errors, and ensuring high-quality outputs across various programming languages, including HTML, CSS, Next.js, and other web development technologies.
- Ensured the AI-generated code adheres to best practices in coding standards, security, and performance optimization.
- Continuously updated and maintained a repository of accurate, efficient, and secure code examples for various programming tasks.

[Search Engine Evaluator]

[Appen]

- Evaluated web search results to improve accuracy and relevance, enhancing user experience and contributing to improved search performance.
- Analyzed website content for quality and relevance, gaining deep insights into SEO best practices and effective content strategies.
- Collaborated with teams to test and refine new search features, applying principles of website design, user interface (UI), and user experience (UX).
- Identified and reported on website security features and vulnerabilities, fostering an understanding of web security standards.

Projects

[OAN Industries]-oanindustries.com

- Rebuilt an outdated WordPress website into a modern, high-performance platform, improving the Lighthouse score from 45 to 100. This prepared the company for its IPO, with an annual turnover of over \$40 million.
- Developed the new site using Next.js, integrated advanced SEO techniques, and utilized Hostinger VPS for hosting and API integration.
- Achieved a perfect Lighthouse score, significantly enhancing user experience, boosting web traffic, and improving SEO rankings.

[Chaar Diwari Studio]- chaardiwaristudio.com

- Designed and developed a modern, responsive website for an architectural firm to enhance online visibility and reach a broader audience.
- Built using Next.js with an intuitive UI, showcasing architectural projects through visually appealing designs and smooth navigation.
- Achieved a Lighthouse score of 98, improving SEO rankings, user engagement, and client satisfaction.
